PROJECTS

Characterization and tribological performance of graphene reinforced bagasse ash epoxy composite,

By using waste, we prepared plastic material and added chemicals to produce low friction epoxy composite that is resistant to wear.

Free water circulation pump,

We built a project that successfully was able to transfer water from a lower level to a higher level without any energy sources.

Go-Kart Racing car manufacturing,

We as a team of four members built a racing car Go-Kart during final year of diploma.

EXPERIENCE

Government college of engineering karad, (2024)

- We have work as Assistant professors in this college, and it should be a great experience for me to the Assist workshop department from last 1 year.

Thank you.
